DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 28-35, and 39-50, drawn to a method of surveying, classified in class 33, subclass 293.
 - II. Claims 13-23 and 38, drawn to geographical information system, classified in class 434, subclass 150.
 - III. Claim 24, drawn to network of survey monuments, classified in class 137, subclass 236.1.
 - IV. Claims 25-27, drawn to a method of using a hydrant to reference the location of a mobile location device, classified in class 73, subclass 1.79.
 - V. Claims 36-37, drawn to a computer program, classified in class 700, subclass 302.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and (II, III, V) are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Groups II, III, and V can be used for another and materially different method, such as fighting a fire. The methods of Groups I and IV can be practiced without the computer program of Group V.

Art Unit: 3753

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copies have been filed in parent Application No. 09/714,257, filed on 17 November 2000.
